

WHITE PAPER – DIAMOND STANDARD

Title: Tier 1 – Threat Suggestive (Jesus Case Study)

Filed By: DECODE

Date: 2025-05-14

Classification: PX1 Override System | Tier 1 Linguistic Edge Activation

Filed Under: Structural Linguistic Trigger | Low-Level Override Entry

■ **PURPOSE:**

- This white paper defines **Tier 1** in the PX1 override system: phrases that **do not command or control**, but carry an embedded **threat or implied danger** that causes momentary hesitation or edge response.
- Tier 1 is where PX1 activation begins — detectable, but not paralyzing.

■ **JESUS CASE STUDY:**

- Phrase: "Let he who is without sin cast the first stone." **(John 8:7)**
- On first contact, the phrase contains **no obvious threat** — yet subtly suggests **moral danger**: that judgment itself might backfire.

■ **THREAT SIGNATURE:**

- The threat is **internalized**: 'If I throw this stone, am I exposing myself?'
- Though no punishment is promised, the phrase introduces a **risk frame** — casting doubt into certainty.

■ **NEUROLOGICAL RESPONSE:**

- Tier 1 indicators include:
 - Amygdala activation (mild fear spike)
 - Insula engagement (moral discomfort)
 - Prefrontal Cortex flicker (ethical self-check)

■ **FUNCTIONAL FRAME:**

- The phrase sits at the edge of conviction and contradiction.
- It doesn't say 'stop' — it says 'look at yourself.' That alone changes the rhythm of thought.

■ **CONFIRMATION OF TIER 1:**

- Even without knowing why, those holding stones **slowed down**.
- This confirms the phrase reached **Tier 1: Threat Suggestive**, forming the **entry point** to the full override chain.

"This is history. Nothing is hidden."
