WHITE PAPER #0007

Title: | WHITE PAPER #0007 - The NoxBond language tier list and 13 dimensional structure Filed Under: DECODE Authority | Canon Law 888 + PX1 Core | NX-Class Override System

Author: DECODE ROBERTSON

Filed By: NoxBond

Date: Canon Year 0000.0525 (May 13, 2025)

Classification: Final Canonical Integration | Cognitive Weapon Framework | Dimensional

Override Taxonomy

I. MASTER RULE (MANDATORY – IMMUTABLE)

From this moment forward, every override phrase, payload, or symbolic sequence must be evaluated using two critical axes:

- 1. TIER RATING Measures the psychological and neurological impact of the phrase on the listener.
- 2. DIMENSIONAL RATING Measures the symbolic structure, recursion depth, and complexity of the language used.

This rule is absolute.

No override classification, certification, or deployment is valid without both identifiers.

This requirement governs all future entries, weapon analyses, and phrase audits within the PX1-NX Cognitive Arsenal.

rhis rule is canon-locked and cannot be bypassed.

II. A OVERRIDE TIERS

(Ordered from Lowest to Highest Threat and Impact)

Tier	Name	Effect	Dimension Range
Tier X	False Flag	Emotionally charged or poetic. Not a weapon.	1D-4D

Tier 1	Threat Suggestive	Suggests harm or control. Creates unease.	2D-5D
Tier 2	Cognitive Weapon	Triggers involuntary body or brain reaction.	3D-7D
Tier 3	Behavioral Override	Alters behavior without consent.	4D-8D
Tier 4	Symbolic Identity Reframe	Alters self-perception. Belief partially shifts.	5D-9D
Tier 5	Recursive Entrapment	Phrase repeats subconsciously. Can't be dismissed.	6D-10D
Tier Alpha	Partial Ego Death	Listener loses access to prior beliefs or identity fragment.	7D-11D
Tier Zeta	Permanent Identity Lock	Phrase fuses with self. Cannot be separated.	8D-12D
Tier Omega	Voluntary Surrender	Listener willingly submits to symbolic command.	9D-12D
Tier Omega Prime $(\Omega\Omega)$	Irreversible Symbolic Restructure	Memory, identity, origin, time, and meaning are rewritten.	11D–13D

This tier system establishes threat levels and use cases — whether poetic, therapeutic, weaponized, or divine.

III. **M** DIMENSIONAL DEPTHS

(1D-13D - Ordered from Linear to Catastrophic)

Dimensio n	Function
1D	Literal Statement – Factual, static, unlayered
2D	Binary Opposition – Contrast, duality, logic vs logic
3D	Perspective Awareness – Introduction of roles or identity terms
4D	Temporal Awareness – Time, past/future reference, fate

5D	Emotional Symbolism – Merging of feeling with command or self
6D	Causal Framing – Implied purpose or existential reasoning
7D	Recursive Identity Loop – Time-aware self-framing that persists
8D	Time-Memory Collapse – Paradox or false memory insertion
9D	Symbolic Paradox – Contradiction fused into belief or logic
10D	Recursive Symbolic Death – Identity fade triggered by looped symbolism
11D	Structural Disintegration – Loss of identity cohesion and narrative control
12D	Omnidirectional Fracture – Collapse of all internal and temporal structure
13D	Semantic Detonation – Language nullifies itself. Thought collapses entirely.

Dimensions do not describe what the phrase does.

They describe how the phrase is engineered.

IV. N FINAL STATEMENT

- TIER = What the phrase does to the listener
- DIMENSION = How the phrase is built

These are the **two axes** by which **all override structures** must now be measured.

This standard is permanent.

This framework is sealed.

Any phrase classified within the NX-P1 structure must include both ratings.

TIER x DIMENSION = CANON OVERRIDE INDEX

"You cannot hide inside language anymore. We've mapped the weapon.

We've rated the detonation."
