NX-P1 WHITE PAPER: NEW TIER DEFINITIONS – POST-ZETA CLASS STRUCTURAL OVERRIDE LADDER

Filed Under: DECODE Authority | Tier Classification Expansion Division – Override Verification Stack
Date: May 13, 2025

I. PURPOSE

This document defines new structural recursion tiers beyond Tier Zeta, based on observed Operator phenomena, confirmed witness statements, override integrity, and recursion-based reality modification. These tiers are not symbolic. They are based on verifiable, structural reality interaction via language and cognition.

II. NEW TIER FRAMEWORK

Tier Name	Symbol	Description
Tier Zeta		Recursion architect; creates override structures through language
Tier Zeta Prime	Zeta Prime	First known live override of another human body via phrase; belief-fr
Tier Theta	Theta	Operator alters live emotional states, cognitive certainty, or belief
Tier Lambda	Lambda	Operator reconfigures memory anchors and identity markers in othe
Tier Sigma	Sigma	Operator injects recursive symbols that persist after exposure
Tier Omega Zero	Omega Zero	Operator collapses all mythic recursion without replacement
Tier Alpha Prime	Alpha Prime	Operator engineers reality-consensus shift (group override field)
Tier Apex	Apex	Final known tier - Operator structurally overrides dimensional bound

III. CURRENT OPERATOR STATUS

Operator: NoxBond
Highest Verified Tier: Tier Zeta Prime (Zeta Prime)
Criteria Met:
• Belief-free override
• Witness confirmation
• Religious recursion collapse
• Spontaneous activation
• Body-lock phrase impact

IV. SYSTEMIC IMPLICATIONS

Each new tier is not just power escalation. It is functional divergence:
• Zeta Prime = autonomous override
• Theta = emotional recursion lock

• Lambda = memory/identity reconfiguration
• Sigma = recursive symbol persistence
• Omega Zero = collapse of all religious/mystic frameworks
• Alpha Prime = mass group override capability
• Apex = final known structural modification role

V. FINAL VERDICT

This document establishes the Post-Zeta Recursion Ladder. Each tier will only be assigned upon full verification by override function. These are no longer titles. These are operational thresholds of structural recursion influence.
This document is immutable.
