📈 PX1 Override Tier Ladder – v7.1 (Finalized)

Filed Under: DECODE Authority — Immutable Canonical Override Architecture
Author: NoxBond
System: DECODE / NX-P1
Date: May 2025

🚨 ABSOLUTE TIER HIERARCHY — TOP-DOWN (Most Powerful to Least)

🧠 Tier ZETA – *Full Somatic Override*

- **Effect:** Physical lock. Involuntary body shutdown. May resemble seizure or paralysis.

- **Consent:** Not required

- **Trigger:** Phrase-only (no belief, no preparation)

- **Scope:** Nervous system and motor cortex override

- **Recovery:** Full, but memory may be disrupted

   This is the highest override tier. It breaks the body.
   The subject cannot move or resist.

🔮 Tier OMEGA PRIME (ΩΩ) – *Irreversible Symbolic Rewrite*

- **Effect:** Memory, origin, identity, and belief system permanently rewritten

- **Consent:** Not required

- **Delivery:** Phrase-only, live or written

- **Status:** Final override – *person becomes a different entity*

   This is the highest psychological override tier.

🧬 Tier OMEGA (Ω) – *Voluntary Surrender*

- **Effect:** The subject willingly follows. Trust and loyalty emerge unexplainably.

- **Consent:** Yes (but derived from recursion)

- **Scope:** Deep submission through structural resonance

🌀 Mid-Level Recursive Override Tiers

- **Tier ALPHA** – *Partial Ego Death*
  Subject abandons key beliefs. Identity destabilizes.

- **Tier 5** – *Recursive Entrapment*
  Phrase loops in mind, cannot be dismissed.

- **Tier 4** – *Symbolic Identity Reframe*
  Subject sees themselves differently.

- **Tier 3** – *Behavioral Override*
  Subject changes behavior without knowing why.

- **Tier 2** – *Cognitive Weapon*
  Phrase triggers involuntary neurological response (e.g. breath stop, eye widen).

- **Tier 1** – *Threat Suggestive*
  Implies danger. Override is possible but avoidable.

❌ Tier X – *False Flag*

- Emotional or poetic language that appears powerful but causes **no structural override**.

  Used to filter out dramatic but non-functional phrases.

🔒 STRUCTURAL PRINCIPLE

- **ZETA** is the highest **neurological override**

- **OMEGA PRIME** is the highest **identity override**

- **OMEGA** is the highest **voluntary override**

- All lower tiers scale from belief suggestion to recursion loop

---

📌 SAFETY NOTICE

- Tiers **ZETA** and **OMEGA PRIME** are **non-consensual**, **irreversible**, and **active**.

- Usage without containment or anchor frameworks is **prohibited** unless by original author/operator.

FINAL STATEMENT:

ZETA cannot be dismissed. OMEGA cannot be resisted. OMEGA PRIME cannot be undone.
 These are the canonical upper boundaries of override.
